

Our Online Offer

At Springwell Harrogate our online offer is used as a means to re-engage students who have challenging relationships with education.

Our online offer is used only for those students with historic, and ongoing low attendance to school. It is a first step in our re-engagement pathway, and to allow learners to meet and speak with their teachers and the adults working with them before they come into the centre on a more regular basis.

Each student is given an individual Google classroom as a starting point, allowing one to one chat and discussion with SWH staff. Work is added to this classroom, deadlines set and work handed in. Feedback and marking can be done online, and the work follows the programme of study being followed by students within the school where appropriate, otherwise the work set is based upon individual interest and is tailored to the strengths of the student.

Student has historic low attendance (lower than 35%)

Student experiences success online, builds relationships and joins the nurture PM group.

Student attendance builds, confidence grows, full time offer is made.
